

202A EGG WASHER

Option:

Features

- ◆ Made of strong stainless steel for great durability and hygiene.
- ◆ ZENYER 202A egg washer is combination of the modular 605A accumulator, the 202A main machine, the optional 602 vacuum egg lifter, 401H egg printer and manual collection conveyor with a capacity of 10,000 eggs/hour.
- ◆ Eggs are vacuum lifted and loaded onto the 605A accumulator by using the 602 Vacuum egg lifter. Then the accumulator will direct 6 lines of eggs into 1 line and transport them to the single row egg washer.
- ◆ 6-row light strips are added under the accumulator and you can pick out any cracked, dirty or otherwise unqualified eggs through the LED lights by sight. There is also a candling cover and mirror to improve the candling results.
- ◆ The proportional doser sprays sanitizer or detergent (customer provides chemicals) onto eggs automatically for food security purposes.
- ◆ The eggs will be cleaned by brushes and warm water (a water heater isn't included in the price, consult our representatives if needed).
- ◆ Water on the eggs will be swept off by the drying brushes while the eggs themselves are dried by the drying fan system, the drying rate can reach up to 95-99%, depending on the environmental humidity.
- ◆ Ideally, connect with the ZENYER 104A egg grader main machine to assemble a ZENYER 302A egg processing line or connect with a ZENYER 104B egg grader main machine to assemble a ZENYER 302AS egg processing line with a capacity of 10,000 eggs/hour.

Model	ZYX-JS1-3-(P)
Product code	202A
Capacity	10,000 eggs/hour
Power	10.9KW,50HZ
Voltage*	380V-415V,3-phase
Dimension (L*W*H)	9.4*3.9*2.0 M
Net weight	1015 kg
Gross weight	1470 kg
Function	Accumulator&candling,sanitizer sprayer,washing,drying,optional vacuum egg lifter,egg printer and manual collection conveyor.
